

# BLok - Online Report Book

The online qualification certificate for dual vocational trainings.

## DIALOG

BLok encourages the information exchange and the communication between the vocational company, the vocational school and the inter-vocational institutions.

## DEVELOPMENT

The personal responsibility and the ability of reflection of the apprentices is encouraged by the development portfolio.

## INDEPENDENT

BLok can be used with every standard browser. A software installation is not necessary.

BLok is an online qualification certificate for dual vocational trainings. Easy to handle and clearly designed, apprentices, trainers and vocational teachers can use the report book commonly on the Internet.

The time and local independent supply and the functional enhancement of the classic format of qualification certificate allow boosting the vocational training quality and strengthening the learning cooperation.

Blok, the online report book combines the qualification certificate with a development portfolio. In the qualification certificate an apprentices can document his apprenticeship process in terms of time and substance.

The development portfolio offers an API to the qualification certificate content and enables a better overview about the professional and personal growth of the apprentice.

The online report book enables a time and local independent handling and checking of the report book and offers a great amount of contact possibilities.

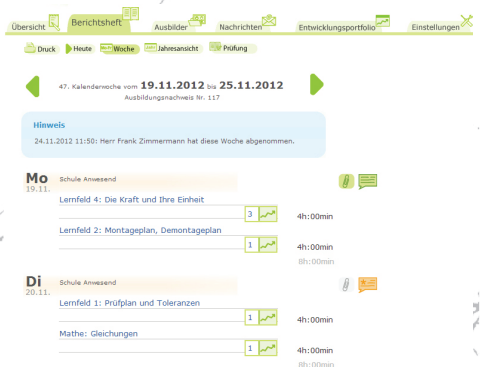

Use the online report book to coordinate with education participants about educational content and to interlock them.

The attractive design and the available keyword search complete the overall picture of this web application.

Thanks to the integrated development portfolio you are able to proceed to an estimation about the current and target state of the apprentice's vocational competences at any moment.

From this can be deduced necessary actions and vocational content can be individually adjusted to the development state of the apprentice.

The storage of vocation-related documents are offered as standard.
